

Ferrari Color

Fabric Material Specs

Fabric signage is a lightweight, easy-to-store alternative to conventional signage materials. Tradeshows have become easier with the wrinkle-free materials used in dye sublimation.

Ferrari Color's dye-sub fabric printer system prints on a variety of fabrics for both indoor and outdoor applications. Ferrari Color stocks the following:

	APPLICATIONS	CHARACTERISTICS
FIRESAFE III	Flame resistant, indoor fabric. Considered a "napery" fabric, meaning it is used for linens (ie. tablecloths and draperies). Great for tradeshow and convention center signage.	Width - 60" Weight - 5.0 oz. Material - 100% Polyester 3 bar knit Firesafe - NFPA 701 (flame retardant)
POLY SATIN	High sheen, indoor fabric. Excellent choice for images with metallic colors (gold, chromes, etc). Used frequently in retail and car dealership applications.	Width - 60" Weight - 4.1 oz. Material - 100% Polyester woven
POLY TAFFETA	Elegant indoor fabric. Lightweight with a slight sheen and bleed through.	Width - 60" Weight - 1.8 oz. Material - 100% Polyester
ULTRA SHEER	Sheer, lightweight, indoor fabric. 80% bleed-through to backside of print. Low text quality. Used heavily in retail. Often hung in front of another graphic to give a 3-D effect.	Width - 60" Weight - 0.8 oz. Material - 100% Polyester woven sheer
HERCULES	Rugged fabric with a very tight weave allowing for deep, rich colors.	Width - 60" Weight - 3.2 oz. Material - 100% Polyester woven
DACRON	Heavyweight translucent outdoor fabric. Similar to nylon with a filament yarn for a clean look and no loose fibers. A loose weave inhibits colors from the deepness and richness of tighter weaves.	Width - 60" Weight - 6.2 oz. Material - 100% Polyester rip stock woven
POLY DUCK	Heavier version of Dacron. Very strong, outdoor fabric with high wind resistance. Used often with banner bugs. Color prints are not as deep as those on other fabrics.	Width - 60" Weight - 3.2 oz. Material - 100% Polyester woven
TRI POPLIN	Three-layered, flame retardant fabric with smooth surface and slight sheen. Thick, tight weave, makes the fabric extremely opaque. Excellent for printing colors.	Width - 60" Weight - 6.0 oz. Material - 100% Polyester woven
BLOCKER	Liner only - not for printing.	Width - 55" Weight - 6.0 oz. Material - 100% polyester 3 layer woven
